

OUR AIRPORT OPERATOR'S EXPERTISE TO SERVE YOUR DEVELOPMENT

**For more than 30 years,
we have been supporting you to design,
develop and operate your airport**

OPERATE & MANAGE YOUR AIRPORT

AMPi helps you to **optimize passenger flows**, from the car park to the aircraft, including the design of **operational management tools** and information systems.

We can assist you in the **effective supervision of your airport facilities** and infrastructure ensuring compliance with **safety and security regulations**.

Our Services - Examples

- Security and safety audits and implementation of security, safety and wildlife management systems
- Car park audit and recommendations for your car park management system
- Airport information systems study
- Organization study of hold baggage/hand baggage/passenger screening systems
- Assistance with calls for tenders for facility management and operational services (PRM, cleaning, security screening, maintenance and more)
- Digital transformation of the airport passenger experience (self-check-in kiosks, baggage drop-off counters, e-gates, self-boarding gates, flight information, go to gate)

DESIGN & DEVELOP YOUR INFRASTRUCTURE

Traffic growth and changing regulations require airport operators to adapt their infrastructure. We can support you in **assessing your needs in terms of capacity** and surfaces through programmatic and sizing studies for your airport facilities.

These developments are supported by **investment plans** that we can help you to structure and/or optimize.

We can assist you at every stage of your project, from capacity studies to construction of facilities, in understanding customer needs and **taking into account your operational constraints** (continuity of service and level of service).

Our Services - Examples

- Assistance to the contracting authority to control pavement repair works
- Hold baggage handling and screening system upgrade, optimized Standard 3 implementation into the current baggage system
- Assistance to the contracting authority to control a new passenger terminal design and construction works.

Concession of the future airport in Ouagadougou

The 30-year concession contract for the construction, financing, operation and maintenance of the new Ouagadougou Donsin airport includes an **investment of more than €220 million** by the concessionaire in infrastructure, works, buildings and equipment for handling passengers and freight in particular.

Work will start in late 2022 and the new airport will be up and running by 2025.

DEVELOP YOUR TRAFFIC AND YOUR REVENUES

We work with you to identify **the growth drivers for your non-aviation activities** by sizing and planning your retail and service offering.

We assist you in optimizing your **car parking spaces and prices strategy**.

We help you to **develop your route network**, promoting your attractiveness and your catchment area to boost your regional and international influence
